

SPI Multi Premia®

28/02/2025

Strategy

SPI Multi Premia® ("SPI MP") relies on the Multi Premia® methodology developed by Finreon and is an official SPI index of the Swiss stock exchange (SIX). The index comprises up to 60 of the largest developed Swiss equities. The Multi Premia® approach combines investments in seven different long only strategies with empirically proven long-term outperformance (so called factor premia): Value, Size, Momentum, Residual Momentum, Reversal, Low Risk and Quality. Very low correlations between the outperformances of these strategies allow a diversified portfolio of factor premia. This enables the Multi Premia® approach to harvest the average factor premium at significantly reduced relative risk. The strategy follows a quantitative approach. SPI Multi Premia® invests in stocks which exhibit characteristics in accordance with the seven factor premia enumerated above, and weights them according to market capitalisation. The return and risk can therefore deviate from the SPI (the "benchmark"). The total risk born by the investor is similar to a Swiss equity investment in Swiss francs.

Current month

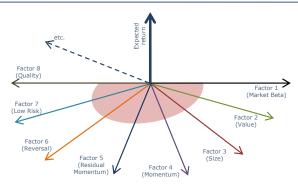

In February, the SPI Multi Premia® index achieved a return of 1.1% and thereby underperformed the SPI, which achieved 2.4%.

The factors Value (3.0%) and Low Risk (3.2%) were able to outperform the SPI this month.

Multi Premia concept

- Stock returns are not only driven by (stock) market risk; there are further factors which help to better explain stock returns
- These factors exhibit empirically proven long-term outperformance ("factor premia") when compared to the market portfolio.
- However, single factor strategies such as value or momentum historically showed strong and long-lasting cycles, high relative risk and significant
- Cycles of different factors tend to be asynchronous / uncorrelated which offers a pronounced potential for diversification.
- A diversified investment in different factors is therefore able to earn the average premium while massively reducing relative risk and drawdowns.
- SPI Multi Premia® invests in a set of seven long-only factor premia: value, size, momentum, residual momentum, reversal, low risk and quality.
